EDUCATION

Vivekananda Global University, Jaipur, Rajasthan 2024–2028 (Expected)
B.Tech in Computer Science and Engineering

TECHNICAL SKILLS

Programming Languages: Java (Basic), C++ (Basic), Python (Learning)

Web Development: HTML, CSS, JavaScript, React, Node.js, FastAPI, REST APIs

Databases: SQLite, MySQL

Tools & Platforms: Git, GitHub, GitHub Actions, Docker, Visual Studio Code, Google Colab, Vercel

Core CS Concepts: Data Structures and Algorithms, Object-Oriented Programming, Database Concepts, Computer Networks, Machine Learning Fundamentals

PROJECTS

WeatherGPT – Conversational AI Weather Advisor *Personal Project*
Tech Stack: *JavaScript (Vite), Python (FastAPI), Open-Meteo API, WebSocket, Docker, GitHub Actions, Vercel*

- Built a full-stack weather advisory app (Vite frontend, FastAPI backend) with a conversational assistant that applies intent classification and entity extraction to natural-language weather queries.
- Integrated the Open-Meteo API for live weather and city geocoding with in-memory caching; added voice input/output (Web Speech API) and a six-language interface.
- Created REST endpoints for weather, alerts and sector advisories (agriculture, aviation, marine); added unit tests, Docker, GitHub Actions CI and Vercel deployment.

GitHub Repository | Live Demo

SpeakUp AI – Communication & Interview Practice App *Personal Project*
Tech Stack: *React, Vite, Node.js, REST APIs, JWT, SQLite/MySQL, Vercel*

- Built an AI-assisted communication and interview practice app for students using React (Vite) and a Node.js REST backend.
- Designed a configurable AI-provider layer (OpenAI-compatible, Groq, Gemini, OpenRouter) behind API endpoints for chat, text-to-speech and realtime voice sessions, keeping API keys server-side.
- Set up JWT-based authentication with SQLite/MySQL support and deployed the application on Vercel.
